The Village doesn't own or control any property near Ogden, except for the rights of way for the subdivision streets. You don't want it sitting out along the street, do you? And, Ogden Avenue is IDOT (state right of way). The rest is private property, for at least several hundred feet from Ogden (there's a park on Arborview, north of Ogden).

The neighbor who complained is northwest of Lockformer. His name is Darrell Franklin, he lives at 4562 Basswood (backs up to Ogden, 3rd house in from the west end of the subdivision), work phone number is (630) 285-7585.

Hope this helps. If he doesn't work out, let me know. We came up with a couple of other names, but they're not close to Ogden. How close do you need to be?

Thanks for replying back.

Mike and I will check our mailing list and contact the Civic Association. Placing the Air monitoring station along the fence line on Ogden would also be a possibility. Would that land be managed by the Association or would that be IDOT?

I don't know if the neighbor that complained about the lights would be interested but another location to the North West of the site would be helpful.

Thanks,
Steve
